

# EXTENSION UNITS & PERISCOPE VENT

These units are used in conjunction with vent mat connectors and associated pipe work, to finally discharge the gases to the outside.

## PERISCOPE VENT

- Used to discharge gases to the outside

## AIR BRICKS

- Ventilation area 8000mm<sup>2</sup>
- Colours: terracotta, buff, anthracite
- Driving rain resistant.
- Can be stacked in multiples.

## VENT TO PIPE ADAPTOR

- Connect gas vent pipe to periscope vent

## HORIZONTAL EXTENSION SLEEVE

- Used to continue the venting through internal ground beams
- Used as an extension to join the rectangular gas vent mat connector to the periscope vent

## VERTICAL EXTENSION SLEEVE

- Provides vertical extension to the periscope vent in the wall cavity (75-150mm per unit)
